ABOUT GOAL GAS

Industrial Area

Goal Gas Limited recognize that each business is unique. That's why we go beyond simply being an LPG supplier - we provide our customers with genuine account management, ensuring their individual needs are met and their expectations exceeded.

We believe it's all about the personal touch. From installation through to supply, our knowledgeable and experienced Business Managers remain dedicated to their customers. They work hard to develop long-term relationships and provide safe, innovative bulk LPG solutions to help each business succeed.

The Liberalization, Privatization and Globalization of economy have opened the path for private sectors players to enter in to those sectors which are reserved for public sector. Out of several significant sectors one of them is Petroleum sector which is opened for private sector. The Government of India has decentralized the import of LPG Goal Gas Limited is a limited company incorporated under the "laws of India".

The "Goal Gas Limited" is incorporated with the aims & objectives to cater the opportunities in the "Petroleum & Gases" sectors along with the motive to serve the nation by providing LPG to each and every household, industry and commercial user at the competitive price with the endeavour to obtain total customer satisfaction in the products & services thereby ensuring a long standing relationship with the customers.

We have a strong distribution & storage network, for our uninterrupted and regular supply of quality LPG. We specialise in supplies of bulk LPG, Propane and Butane from the import/export terminal of our principle. We not only supply gas but we do help our customers by our expertise and become a partner in their growth.

The group's decades of experience, innovation and exceptional people differentiate our approach to delivering integrated solutions notwithstanding the diversity and complexity of an exponentially changing environment.

MARKET SCENARIO

Auto LPG

This is time to create Auto LPG Dispensing Stations, as the Government of India has come forward with progressive proposals, enacted laws and rules to promote LPG as ideal fuel considering the advantages on cleanliness, eco-friendliness and universal availability besides the cost factor. While it has become mandatory to use LPG as fuel in New Delhi and Mumbai for public vehicles such as buses, trucks, vans, auto rickshaws, taxis, etc., a huge number of private-owned vehicles are also running with LPG in these metros and other metros as well. Soon it will be mandatory to use LPG as auto fuel in other cities of rest state and their capitals, major cities and towns. Two wheeler kits also introduced. Delhi, Haryana, Jammu & Kashmir and other state Government are in the process of introducing Gas business in their cities.

Auto LPG Market

The above factors have opened a new vista in automobile sector, added to it, many of the automobile giants like Maruti, Hindustan Motors, Hyundai, Ford, GM, Bajaj, TATA, Leyland, Swaraj Mazda, etc., have started manufacturing Auto LPG operated vehicles as OEM. Once the availability of more ALDS network are established - Which is expected to happen within the next two years- there will be a spurt for conversion to Auto LPG.

India produces about 62 lakhs of vehicles and with the entering of new international players from Japan, Italy, Germany, France, etc., market will be flooded with more varieties of vehicles in petrol. This will lead to an increase in conversion to Auto LPG, which will create more demand for Auto LPG stations. The most expected vehicle Nano also will be delivered with petrol engine at first and gas and then diesel. A proposal of using LPG in existing diesel engine is also in consideration. The usage of domestic cylinders in automotive vehicles is prohibited by law, and it will be effectively enforced wherever the ALDS are installed, and the gas-based vehicles are compelled to go in for the LPG version with fitted tank. From the above, it is found that a ready demand exists for Auto LPG which will see tremendous increase in the years to come. As per a survey in India, 18, 00,000 number of petrol cars have already been converted to LPG. These cars are running on LPG using the commercial and domestic cylinders. Assuming that a car in India runs approximately 12,000 km in a year,

Auto LPG

MARKET SCENARIO

Packed LPG

According to the latest scenario of the Natural Gas Analysis, the Natural Gas market in India is expected to be the one of the fastest growing in the world during the next two decades. Among its segments LPG has made a substantial progress to become the most convenient, cost effective and pollution free means of fuel, especially in the middle class segment. LPG market in India is not at all versatile and competitive..

Packed LPG

LPG Demand in India

- Fourth largest consumer of LPG in the world after USA, China & Japan.
- Third largest consumer in domestic sector in the world after China & USA.
- Major marketing of LPG is Domestic Sector.
- Home Delivery of 3 Million LP Gas cylinders per day (i.e 900 Million / year)
- steady Growth @ 8% p.a. in LPG Consumption in India.

MARKET:

The LPG market is increasing every year by 11%. As per the present Govt policy, from the recent announcement of Government of India the Government proposed to pay the subsidy amount directly to the account of the person. By this scheme the customers can buy LPG from any suppliers and they will get the fixed subsidy on their account as everybody know the private companies like us will do better service compare with Government companies as in any industry.

Packed LPG

BUSINESS OPPORTUNITY

Join hands with India's leadign LPG company as a dealer/distributor/retailr business opportunity:

We at Goal Gas believe that within 1-2 years 40-55 percent of the domestic user and 70-80 percent of commercial and industrial user of LPG would switch to nonsubsidised and commercial LPG due to steep increase in prices of liquid fuels and Government policies to reduce subsidy. After starting of D.B.T.L scheme a huge market in domestic & commercial sector has been grew up.

To capture the golden opportunity in LPG sector, we are working towards building bottling & blending plant of LPG across India with concentration on regions where the consumer base is waking up to the needs for a quality product and world class services in LPG sector. We are fully committed to back the Dealer's operations and management through an integrated supply & distribution chain and marketing plan.

We are offering the opportunity to you to be a part of Goal Gas Family; we are providing three types of opportunity.

- District Distributor/ C&F
- Area Dealer
- Retail Outlet
